EDUCATION

The University of Texas at Austin, Austin, TX

May 2028

Bachelor of Science in Computer Science, Minor in Digital Game Industries | Cumulative GPA: 3.74

Relevant Coursework: Data Structures, Discrete Mathematics, Computer Architecture, Operating Systems

SKILLS

Programming Languages: Java, Python, JavaScript, C, C#, HTML/CSS

Technical: Git, React, Unity, Figma, Bash/Linux, GDB

Languages: Russian (Fluent)

EXPERIENCE

JAPANLAB INITIATIVE AT THE UNIVERSITY OF TEXAS AT AUSTIN, Austin, TX

Aug 2026 - Present

UI/UX Designer

- Designing **UI/UX systems** in Figma and Unity, translating complex religious and historical iconography into an intuitive, accessible player experience.
- Researching primary and secondary sources on medieval Japanese Buddhist cosmology to inform design decisions.
- Contributing to a semester-long prototype bridging humanities research and game design, intended for use in university courses on Buddhist literature and history.

UNIVERSITY OF TEXAS AT AUSTIN COMPUTER SCIENCE SUMMER ACADEMIES, Austin, TX

June 2026

Program Assistant

- Fostered a collaborative, inclusive environment for **60+** 10th–12th grade students during each week-long machine learning summer camp session.
- Provided one-on-one and small-group support on **machine learning coursework**, helping students debug code and work through concepts such as the perceptron algorithm and Q-learning algorithm.

JAPANLAB/EPOCH HISTORY GAMES INITIATIVE INTERNSHIP, Austin, TX

Oct 2025 - May 2026

Gameplay Programmer and UI/UX Designer

- Led end-to-end development of **core gameplay systems** and modular UI architecture in Unity using C# for *Quest for Quinine*, an educational video game deployed to university students.
- Designed and built the **inventory system** UI, creating readable, intuitive interfaces for tracking item uses and checkpoint-triggered save data.
- Collaborated with engineers, designers, and researchers to review code and refine software features using Git.

PROJECTS

PORTFOLIO WEBSITE | React, HTML/CSS | <https://mkoscheev321.github.io/MariaKoscheevPortfolio/>

May 2026

- Built and deployed a personal portfolio site in React, creating reusable JSX components for projects, experience, and contact sections.
- Implemented interactive UI elements for direct email contact, resume download, and GitHub navigation, improving site usability and recruiter access to key information.

QUEST FOR QUININE | C#, Unity

Oct 2025 - May 2026

- Developed **core gameplay mechanics**, including player movement, interaction triggers, and progression logic, implementing custom animations for key player interactions.
- Built the **inventory system** UI, creating intuitive interfaces for tracking item uses and checkpoint-triggered save data.
- Designed and implemented scalable UI components through **Unity Canvas**, translating complex data into intuitive user interfaces with a focus on performance and accessibility.

BIT BLAST | C#, Unity | <https://block-blast-but-i-need-to.study/>

Apr 2026

- Developed a logic-gate puzzle game in a 24-hour sprint, gamifying Boolean operations (XOR, AND, NAND) to reinforce **computer architecture concepts** through spaced repetition.
- Engineered a high-performance UI-based engine using Unity's Canvas system along with **C# scripting** to handle movement, scoring, and dynamic difficulty scaling.

LEADERSHIP & COMMUNITY INVOLVEMENT

UNIVERSITY OF TEXAS AT AUSTIN, GIRLS WHO CODE, Austin, TX

Jan 2025 - Present

Publicity Director

- Designed and distributed **high-impact promotional materials**, including digital assets and physical flyers, to communicate club initiatives and technical workshop opportunities to a diverse student body.
